Frequently Asked Questions

Why choose fiber protective packaging?

The material provides superior protection, such as cushioning properties, while also protecting against the elements by absorbing moisture while in transit without compromising the integrity. The HC Companies certifications help validate an organization's overall sustainable commitments.

Are your products recyclable?

Yes. We've purposefully blended our material to ensure repulpability along with acceptance by recycling facilities and curbside programs, following the requirements of traditional paper/cardboard recycling. Please check with your local municipality for specific recycling requirements and accepted materials.

How long will it take for your fiber molded pulp products to break down?

The exact duration of time will vary depending on your individual environmental conditions and thickness of each product. Generally, our fiber products will break down in less than two years.

How can I obtain a sample of your fiber molded pulp products?

Please reach out to our Customer Service Team at customersupport@hc-companies.com for product samples or additional specifications.
